

Test Scenarios

Our goal was to have 2-3 test scenarios per persona. And we aimed to test at least 2 people that represent each of the five personas. Below are the test scenarios we used for each persona, as well as the number of tests that passed and failed. We utilized the same test scenarios as used in the wireframes testing stage, though we tried to find a variety of people within each persona to test with (i.e. we tried to avoid testing the same people as we had test the previous project).
